

Hybrid Zippered Mattress Cover

The exterior is made of Polyester stretch knit. The upper interior is lined with a polyurethane membrane.

We use a special tight zipper with very tiny teeth, an interior flap and an exterior Bugstop seal that does not allow bed bugs in or out even if the zipper is not 100% zipped. Our encasements have no seams, pockets or folds.

The covers need only to be washed every 3 or 4 months if there is no bed bug problem. Between washings, simply wipe down with a damp cloth or vacuum with each linen change.

Covers stretch to fit a 9" mattress to a 13" mattress.

- Laboratory tested and Certified Bedbug Proof – Independently tested
- Dust Mite and Allergen Proof
- Water proof on top portion of cover
- Polyurethane lining on inside top portion of cover
- Made of soft and silky polyester stretch knit
- Flame retardant

To Launder or Remove Cover:

- Gently peel the tape back from the cover
- Unzip the cover completely
- Gently ease the cover off the mattress
- BEFORE WASHING – Zip cover completely closed and gently place tape over the zipper
- Machine wash and tumble dry in temperatures up to 140°F
