

Austin Air Bedroom Machine™

This is the most advanced filtering system that Austin has ever designed. It has been built to meet the requirements set out by the John Hopkins University Medical School for ongoing studies where this new filtering system must capture gasses and particles at the nano size level.

For people who desire a better quality sleep.

The Nation Sleep Foundation Bedroom Machine™ combines proven filter technology to provide a safe and effective solution to enhanced sleep.

Every minute, over 250 cubic feet of air passes through 15 pounds of Activated Carbon, over 60 square feet of True Medical Grade HEPA and HEGA Carbon Cloth, providing air so clean it could change your life and how you sleep.

360° Progressive Filtering System

The Bedroom Machine™ addresses the complete spectrum of air cleaning, removing sub-micron particles, noxious gases and chemicals. Austin Air's 360-degree intake system draws air into all sides of the "The Bedroom Machine™", passing it through a 5-stage filter.
